

Please leave the current FM translator service in place and DO NOT replace with Low Power FM (LPFM) stations. We have all of our radios/stereos in the house, car and portable stereos tuned to K-LOVE, which exists in Austin, Texas at 92.1 FM. It has been great to have a radio station that every member of the family can listen to, has uplifting Christian music and we don't have to worry that our child will receive the wrong message or misinformation. We even financially support this station because we want it to stay in our area. There is no other equal Christian radio station in the Austin area and we would definitely have a BIG void to fill ... unfortunately I don't see another station filling that void. Austin has been lacking a good Christian music station for many years and finally had a station meet the need. K-LOVE provides information from a Christian world view and gives listeners an alternative to the liberal media, finds edifying entertainment and has led many otherwise troublesome youth to know the Lord and change their lives, with testimonies of kids changing from Satanists to Christians and wanting to change and impact their world for Christ instead of continuing in their previous life of crime. It would be a great loss to Austin, Texas and to the United States to remove K-LOVE from the airways.
